OPTiM Corporation

“Optimal Biz for Mobile,” #1 Share in MDM^(※1) Market in Japan Offers Remote Lock and Wipe Service for Windows PCs and Tablets

~ More Secure Management Even on Windows8.1 Tablet! ~

Tokyo (November 1, 2013) – OPTiM, a leading provider of online IT support solutions that enable creativity collaboration and convenience, announced today that its “Optimal Biz for Mobile,” that has #1 share in MDM market in Japan^(※2), offers remote wipe features on Windows PCs and tablets from November 1st, in addition to its existing remote lock features.

Optimal Biz for Mobile is an application that securely manages smartphones and tablet devices that are used in or provided by the company. By installing the app on iPhone, iPad, Windows devices, or AndroidTM devices, the IT manager can do the followings on the browser-based console:

- Lock devices remotely if the device is lost or stolen
- Prohibit certain non-business applications
- Set Wi-Fi settings
- Manage device information as assets

Optimal Biz for Mobile provides unique, powerful features with the user-friendly interface that other vendors do not. It also keeps successful track record of business with many major companies.

Optimal Biz for Mobile protects confidential information on Windows PCs and tablets with the remote lock features when they are lost or stolen. However, in addition to this existing feature, the remote wipe features is now available for more robust security (Surface Pro supported). The basic features of Optimal Biz for Mobile include application prohibition, report export, alert notification, it also offers stronger security with security settings such as to prevent malicious use of Windows devices, activate firewall and Windows Update. Furthermore, it restricts USB or CD/DVD/Blue-ray, offers system diagnosis over HDD and CPU temperature, and system recovery activation.

OPTiM continues to provide innovative solutions and services for smart devices that are easy, safe and efficient to every single customer of ours.

【NOTES】

- Provides equivalent of remote wipe creating where information is protected by deleting encryption key to the encrypted disc drive by BitLocker.
- Windows RT is not supported.
- Please consult us for product requirements.

※1 MDM: Stands for Mobile Device Management; a solution for enterprise to manage smartphones or tablet devices and offers security when the devices are lost or stolen. It also offers remote lock, prevent launch of malicious application.
